

Digital Region: Next Generation Broadband Infrastructure

Dear Resident

Digital Region, South Yorkshire's Broadband Network is coming to your area soon.

Digital Region will provide Super-fast Broadband with speeds of at least 25mb to the majority of homes and businesses in South Yorkshire. The network is being installed across the four local authority areas of Barnsley, Doncaster, Rotherham and Sheffield and will be completed by mid 2012. The provision of this level of broadband service will transform the region, creating significant economic and social investment. To the individual, the network will give access to enhanced internet and broadband services.

Our subcontractors, KCOM and North Midland Construction, will be starting the construction of the network in your area in the coming weeks. This will involve laying cable in the public highway local to you. We would like to assure you that we will keep disruption to you to a minimum at all times and that we are committed to the highest standards of safety management and quality workmanship.

If you have any questions or comments regarding the construction work in your area, please do not hesitate to call the construction team on 0845 1212998.

For all other information please visit the Digital Region website at www.digitalregion.co.uk.

Thank you in advance for your cooperation and patience.

Yours faithfully

Thales UK

Delivering Digital Region in South Yorkshire
